

Test Automation Made Simple with Chrome DevTools Recorder

Introduction

- **Who am I?**
 - Co-Founder of GeoSTQB
 - Founder of Owloops
 - QA/DevOps Engineer at Toptal
- **Recent Achievements:**
 - Interviewed 170+ QA engineers worldwide
 - Create Georgian programming language

Sharing a Story

- Joining a banking institution:
Encountered outdated test framework
- Modernization efforts: Ran into
maintenance challenges
- The recurring cycle: Build, Cover,
Refactor, Fail, Repeat
- The power of Google Chrome Recorder:
A wish during testing challenges

DevTools Recorder Benefits

- **Simplifying Test Creation with DevTools Recorder:** Streamline steps, efficiently handle assertions, and select elements effectively.
- **Enhancing Debugging with DevTools Recorder:** Execute step-by-step, inspect with breakpoints, and simulate varied network conditions.
- **Integration & Extensibility:** Integrate effortlessly into CI/CD and adapt recordings for tools like Cypress and Puppeteer.

Demo

- Preconditions: Activate the recorder panel
- Demo website: <https://coffee-cart-two.vercel.app/>
- CLI tool: Run tests locally (optional)
- Code: <https://github.com/pgagnidze/recorder-demo>
